MENTORING

Corporations and other institutions often have mentoring programs. Mentoring is a highly effective way to nurture and retain employees with talent and potential and to develop managerial and supervisory skills. It is also effective in bringing out the “best” in mentors and mentorees. However, often “mentors” do not know how to successfully mentor, and likewise, “mentorees” do not know how to make the best use of their mentors. We can help you define, develop, evaluate, and strengthen mentoring programs, greatly enhancing the productivity of your organization.
